Step 4 / Étape 4

PCIe Card Installation Notes

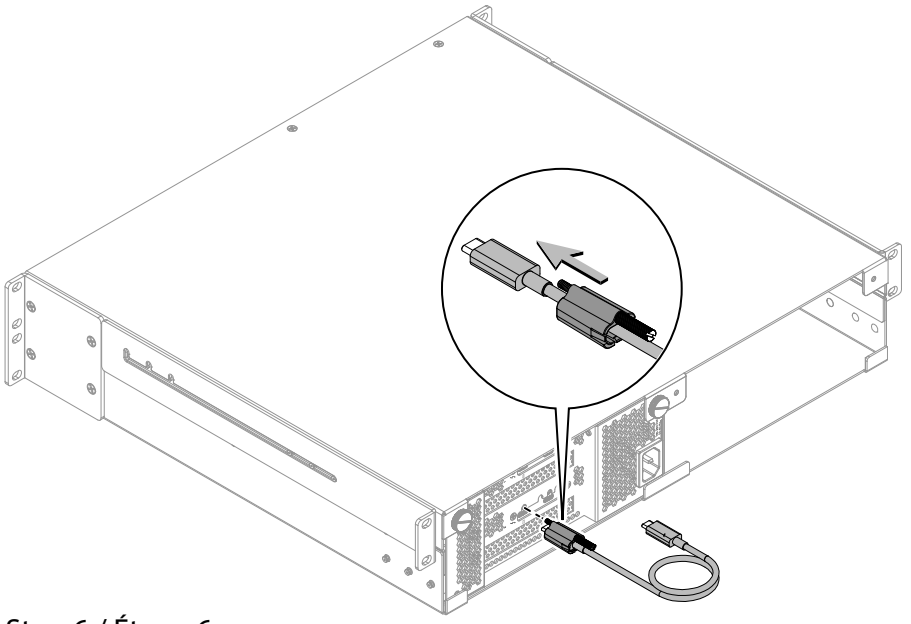

- The open slot in the middle — furthest away from the wall (slot 1) — is the preferred slot for a higher-powered PCIe card.
- When the outer PCIe slot — closest to the wall (slot 2) — is occupied, the fans operates at maximum speed.
- When installing both an Avid Pro Tools | HDX card and an SSD card, install the SSD card in slot 1 and the HDX card in slot 2.

Remarques concernant l'installation des cartes PCIe

- L'emplacement ouvert au milieu — le plus éloigné de la paroi (slot 1) — est l'emplacement recommandé pour une carte PCIe à consommation élevée.
- Lorsque l'emplacement PCIe extérieur — le plus proche de la paroi (slot 2) — est occupé, les ventilateurs fonctionnent à leur vitesse maximale.
- Lors de l'installation simultanée d'une carte Avid Pro Tools | HDX et d'une carte SSD, installez la carte SSD dans le slot 1 et la carte HDX dans le slot 2.

Step 5 / Étape 5

Step 6 / Étape 6
